Summary

Frontend team lead at HangiKredi (Istanbul). I lead the frontend architecture of a credit-comparison platform serving millions of users, and ship open-source developer tools for the Anthropic Claude API on the side. My public work focuses on making the parts of the LLM stack that the SDK hides — streaming, prompt caching economics, agent tool-use loops, prompt iteration — legible to the people building on top of them.

Featured Work — Claude Dev-Tool Suite

Four browser-only, BYOK, open-source developer tools built on a shared ~150-line SSE client. All MIT-licensed, no backend, runs locally only.

Tool	What it does	Stack
claudoscope	Live x-ray of Claude API calls — prompt caching, token composition, cost in dollars, as the response streams	Next.js · TS · Tailwind v4
agent-replay	Replay a Claude agent's tool-calling loop step-by-step on a cinematic timeline	Next.js · TS · Tailwind v4
prompt-lab	A/B test prompts (or models) side-by-side — output, latency, cost on a verdict line	Next.js · TS · Tailwind v4
tool-lab	Interactive Claude tool-use sandbox — define tools, hand-mock responses, watch the agent loop	Next.js · TS · Tailwind v4

Five long-form technical write-ups documenting the design and engineering decisions, on Medium and ferhatatagun.com/blog:

- Building a streaming Claude client in the browser — without the SDK** — the ~150-line SSE parser with `tool_use` delta accumulation that replaced the official Anthropic SDK for browser work.
- Prompt caching is the cheapest Claude optimization. Nobody measures it.** — the four `usage` fields most apps log nowhere, and the cache hit ratio that pays for itself in a week.
- Your prompt isn't better. You just remember it being better.** — the case for measuring prompt iteration instead of shipping by vibes, with worked examples.
- Build the sandbox before you write a single tool** — why most agent teams write implementations first and discover the design was wrong, and the fifteen-minute fix.
- How I debug Claude agents by replaying their trace** — why JSON is the wrong primitive for post-hoc agent debugging, and the three failure modes that become obvious in a timeline view.

Experience

Frontend Team Lead · HangiKredi

Dec 2023 – Present · Istanbul, Turkey (Hybrid) · Full-time

- Lead the frontend team for Turkey's largest financial product comparison platform.
- Own the frontend architecture across React, Next.js, TypeScript and Vite-based projects.
- Drive team practices around code review, performance budgets, design system consistency, and AI-augmented workflows (Cursor, Claude Code).

Creator — Claude Dev-Tool Suite · Open Source

May 2026 – Present · Remote

- Shipped four browser-only Claude API developer tools (see above).
- Wrote a shared SSE streaming client (~150 lines of TypeScript) that powers all four tools without the Anthropic SDK.
- Published five long-form technical articles on the implementation, cross-posted to Medium with canonical URLs on ferhatatagun.com.

Frontend Developer · HangiKredi

Dec 2022 – Dec 2023 · Istanbul, Turkey (Hybrid) · Full-time

- Developed and maintained customer-facing frontend features.
- Worked across the company's React/Next.js stack on credit, insurance and banking product comparison flows.

Frontend Developer · Netmera

Apr 2022 – Nov 2022 · Istanbul, Turkey · Full-time

- Frontend development on a customer engagement platform.

Frontend Team Lead · RND

Nov 2021 – May 2022 · Istanbul, Turkey · Full-time

- Led a small frontend team across React projects.

Frontend Developer · RND

Jan 2019 – Oct 2021 · Istanbul, Turkey · Full-time

- Frontend development across multiple React-based client projects.

Frontend Developer · Beavers Workshop

Jan 2016 – Nov 2020 · Istanbul, Turkey · Part-time

- Long-running freelance partnership on web frontend projects.

Frontend Developer · Netuce

Jul 2018 – Nov 2018 · Istanbul, Turkey · Full-time

Junior Frontend Developer · Literal Web Dizayn

Jun 2017 – May 2018 · Istanbul, Turkey · Full-time

IT Responsible · Sönmez Home Modern Mobilya

Jan 2016 – Mar 2017 · Istanbul, Turkey · Part-time

IT Staff · Saloon Mobilya

Jun 2015 – Sep 2015 · Istanbul, Turkey · Part-time

Intern — Web Editor · PLATİN GROUP AŞ.

Sep 2013 – May 2014 · Istanbul, Turkey · Internship

Tech

AI & LLMs: Anthropic Claude API · MCP (Model Context Protocol) · Cursor · Claude Code · prompt engineering · agent design · BYOK tooling

Languages: TypeScript · JavaScript · HTML · CSS / SCSS

Frameworks: React · Next.js · SvelteKit · Vite · React Native · Express.js · Gatsby · Remotion

Tooling: Tailwind CSS v4 · Framer Motion · UnoCSS · Biome · MJML

Practices: Frontend architecture · code review · team leadership · performance budgets · design systems

Education

Üsküdar Anadolu Lisesi · 2010 – 2014

Selected Projects

Source on github.com/ferhatatagun:

- **claudoscope** — live x-ray for Claude API calls
 - **agent-replay** — replay Claude agent traces step-by-step
 - **prompt-lab** — A/B test Claude prompts side-by-side
 - **tool-lab** — interactive Claude tool-use sandbox
 - **ferhatatagun.com** — personal site (SvelteKit + UnoCSS)
